We've done your homework for you.

Best Pick Reports is recognized and trusted for its advanced research system that has been refined over the past 14 years. Our research methodology and screening processes are **independent, unbiased, rigorous, and exceptionally reliable.**

approach comes at a cost that others are not willing to bear, but our ongoing investments into our research operations serve as the very reason we get it right. When we list a company as a Best Pick, we absolutely believe it to be the case; and that belief continues to be confirmed by the enormously positive experiences our loyal users report.

We conduct the entirety of our own research and use those results to determine the area's Best Picks. This

Independent Research

Best Pick Reports is published by an independent research firm.

Valuable Info & User Tips

Report includes valuable educational information & user tips.

410,000+ Reviews

Our research staff has conducted thousands of interviews since 1997.

Invitation Only

Eligibility is based on more than 100 reviews; companies cannot buy in.

Insurance

All companies are required to maintain proper insurance and professional licenses.

What is a Best Pick?

It's a quality measure indicating that a company has proved itself to be among the very best.

BEST PICK REPORTS RANKINGS

OBJECTIVITY

We do not accept company references, ratings from other sources, or self-initiated reviews in our research database.

We initiate and conduct every single research interview through our research centers.

STATISTICAL VALIDITY

We develop a company's rating according to all the data we have about that company.

We require an A rating based on at least 100 telephone interviews conducted by our research staff.

INVITATION ONLY

We do not sell out by allowing companies to simply buy in.

We require all Best Picks to re-qualify via our research each year.

OTHER RANKINGS

Handpicked references are not research.

Others accept cherry-picked references and recommendation letters as well as a few select phone calls to serve as "research."

Write-in reviews can distort data.

Voluntary rating systems provide more opportunities for biased reviews, and many platforms selectively suppress negative data from the ratings for a fee.

Buying placement isn't earning a rating.

Other rating organizations allow subpar contractors to pay for top placement.
